<b>Areal Density</b>	1.12 lbs/sq ft
<b>Thickness</b>	0.331 (in)
<b>V50 (.357 Sig)</b>	1789 fps
<b>V50 (.44 Mag)</b>	1687 fps
<b>Armor Materials</b>	Twaron® Microlaminate, Gold Shield®
<b>Armor Construction</b>	Hybrid construction; Structural design; Perimeter stitching
<b>Panel Covering</b>	70 denier nylon with urethane backing and heat sealed edges

*\*All armor models come with a 5"x8" soft trauma plate*

## INDIVIDUAL ARMOR PROTECTIVE SYSTEM (IAPS):

An Individual Armor Protective System is a modular approach to body armor that allows you to select from a family of armor solutions, special threat plates, concealable carriers, external carriers and uniform outer carriers. Choose from an array of armor models and special threat plates that meet the level of protection you desire. Then, integrate them into a carrier based on your individual duty assignment. The IAPS approach assures you select the body armor that is right for you!

Safariland offers a selection of IMPAC special threat plates that allows you to upgrade your protection against a variety of threats.

## Universal AJ Carrier Features

- 1 Internal panel suspension system secures armor panel inside carrier
- 2 External material made of 100% double-cloth nylon LiteLok with Nano-Sphere repellency for long-term durability
- 3 Combination 4- and 6- point strapping system provides maximum adjustability
- 4 Internal liner made of antimicrobial mesh which repels micro-organisms and reduces odor
- 5 Dual special threat plate pocket allows for insertion of IMPAC plates (5" x 7", 5" x 8" and 7" x 9")
- 6 Retention tails (front and rear) helps to reduce shifting of armor panels
- 7 External, hidden zippers for easy insertion of armor panels
- 8 Available colors include black, navy, white, olive, brown and tan
