Level III 6360/6365 perform Test 1,2 and 3  
Level IV 6360/6365 with Sentry installed perform Tests 1,2,3, and 4  
Add one Level of Retention for Sentry Installed

Although no duty holster is "Snatch-Proof", retention should be one of the primary design objectives of any manufacturer. Unfortunately, some holster companies are still selling holsters that will "Give-up" their gun with one quick yank in the right direction.

Safariland's duty holsters are not only built to last, they're designed with weapon retention and officer safety in mind. However, no industry standard exists to rate a holster's ability to resist weapon takeaway attempts.

For that reason, Safariland has developed a system of rating a holster's Retention Level.

These retention ratings give the holster buyer a method to quickly determine the relative Retention Level of different holster models. The ratings

- Level I** Retention holsters offer **Moderate Retention**
- Level II** Retention holsters offer **Enhanced Retention**
- Level III** Retention holsters offer **Optimum Retention**
- Level IV** Retention holsters offer **Exceptional Retention**
- Level V** Retention holsters offer **Maximum Retention**

The information on both sides of this flyer will help explain how Safariland performed its test. You can perform your own test and compare with other types of uniform holsters.

**For all tests:** Mount holster on a strong 2 1/4" duty belt. Mount the belt on an immovable object or a volunteer testing associate; take caution not to injure anyone. Grab stock of handgun and pull in the direction outlined in test. Try not to open the thumb-break snap with your hand during

- Test 1 & 2** Pull from front - Pull out the front of the holster  
Pull from side - Pull out toward the side of the holster  
Pull from rear - Pull from the back of the holster

- Test 3** Level II & III Testing – (Repeat test 1 & 2 in addition to below)  
295 - Snap is open  
6280 - Hood is pressed down  
070 - Thumb-break snap is open and trigger guard snap is closed  
6360/6365-ALS-Hood is open

- Test 4** Level III, IV, & V - (Repeat test 1, 2 & 3 in addition to below)  
070 - Thumb-break snap is closed and trigger guard snap is open  
6360/6365-ALS-Hood is open
