

**Model 2036H (2448H)
Polycarbonate Shield**

Part ID#: 1002679 (1002708)

Peacekeeper Shield

Handle Design:	The "A" frame design was conceived to allow for prolonged use without the risk of suffering severe arm fatigue. The ambidextrous handle allows the arm to be kept in a strong-arm vertical position or optional 45-degree cant, giving the user a variety of ways to hold the shield. Holding the center of the handle will evenly distribute the weight of the shield across the entire area. The shield shall be equipped with a foam padding system to protect the forearm in various positions. The padding shall be ¾", high-density foam for maximum impact resistance and added comfort.
Body Materials:	The strike face is molded from a rigid .158 inch/4mm polycarbonate sheet. Only high quality, low distortion material is used including polycarbonates that meet or surpass ASTM standards for flammability and thermal and mechanical properties. A specific degree of flexibility is needed to dissipate the impact energy encountered during riot-control operations. Transparencies Low-distortion polycarbonates with high-impact resistance shall be used. The clear areas shall not spall or craze upon impact. The vision areas must provide multiple impact protection from materials commonly associated with riot-control procedures. All edges shall be rounded for added strain relief of the protective materials. The shield must perform equally when held in the right or left hand.
Dimensions:	20 in. (50.8 cm) x 36 in. (91.44 cm) 24 in. (60.96 cm) x 48 in. (121.92 cm)
Shield Type:	Riot
Material:	4 mm Shatter-Resistance Polycarbonate
Handle Type:	Triangle
Weight:	6.0 lbs. (2.72 kg) 6.8 lbs. (3.08 kg)
Weight Packaged:	8.45 lbs. (3.83 kg) 9.25 lbs. (4.19 kg)
Accessories:	Vinyl Decals for Police (H7000), Sheriff (H7001), Corrections (H7002) and Policia (H7002) / Fabric Body Shield Cover
Note:	Ship unassembled
Guarantee:	Hatch® replacement guarantee, under normal field use.
Country of Origin:	USA
