

# GAS MASK ADAPTER

## ECONOMICAL CONVERSION

### GAS MASK ADAPTER

The Gas Mask Adapter (GMA) was developed due to increasing amounts of gas deployment in the field, and provides an economical and user-friendly solution to gas mask connectivity. The GMA easily attaches to existing communications systems for a quality, yet economical, gas mask communications system. Can be retrofit to headsets other than TCI brands. Available in Black.

### FEATURES

- An economical and easily operated solution
- Easily connects to existing communications systems; eliminates need to send PTTs to factory for rework with a gas mask port
- Available in Black
